

LINE BIDDING 101

Monthly Bid Packet

The Monthly Bid Packet provides a lot of information about the upcoming Bid Period. There is information for ALL Bidders in the packet and we HIGHLY suggest you review the Packet each and every month.

The Bid Packet Provides:

- Number of Block Hours in each base
- Projected RSV Numbers
- Bid Period Dates
- Number of RSV days off (11 or 12)
- Bidding Timeline Chart
- LIVE Bid Help times and locations
- Email address for Bid Help and Questions

Frontier Airlines Flight Attendant Bid Package

MCO BASE

April 1 - April 30, 2021

Recurring Monthly Bid Dates and Times - MCO local time	
Bids Open - Pref Bid and RSV Pref Bid	6th @ 14:00
Pref Bids Close	12th @ 14:00
Pref Bids Posted	15th @ 14:00
Reserve Bids Close	16th @ 14:00
Reserve Bids Posted	18th @ 14:00
FULL TIME CREWMEMBER BID WINDOW	60:00 - 120:00
FULL TIME COMPANY THRESHOLD	Per Article 5.6.3.b., max will be 89 or 95(4 times per year).

Pref Bid News: Please be aware that your global preferences (Schedule Build Options, or SBO) are considered throughout the bid sheet(s). When bidding individual preferences, it is important to bid in a manner consistent with global preferences as this will help to expedite processing and system run time. Please keep this in mind when asking for days off and bidding specific type of trips. Pay close **attention to the published bid window and threshold ranges** for your category, and plan accordingly when bidding for monthly schedules.

	Projected Bidders	Projected Line Holders	Projected Reserves
CHI	288	206	82
DEN	611	447	164
LAS	430	318	112
MCO	642	475	167
TTN	319	236	83
MIA	152	120	32

Where do I start??

Review the Bid Packet

Every month the first 2 pages of the bid packet has VERY important information that can affect every bidder: avg. daily credit for pairings, marketing updates, number of bidders and anticipated RSV numbers, AND most importantly: WHEN AND WHERE to get help with your bid!!!!

Understand your RELATIVE Seniority

Your bidding number will vary from month to month. Take the number of bidders and subtract the number of anticipated RSV.

600 bidders and 120 RSV = 480 line bidders

If I am bidder 240 (or lower) I am in the bottom 50% and ... I will need to bid accordingly (be realistic!)

Relative Seniority and Bid Calendar

- Each month when you open the PREF BID folder to input your Bid, your current month Seniority number will show on the top left of the screen, above the Calendar view of the bid month.
- On the calendar view you will see any preassigned duties for the month. Recurrent (RGS), vacation (VAC) or any other dates that were “pre-blocked” before bids opened.
- PLEASE NOTE: If you ever see anything on the calendar that you do not recognize or feel there is an error, you MUST contact crew planning before bids close for that month.

Threshold: Company vs. Personal

Personal Threshold

Bidders may set a “Personal” Credit Threshold (PCT) in their SCHEDULE BUILD OPTIONS (SBO). This Threshold will tell the system how many hours you want to work. The window is anywhere between 60:00 and 120:00 every month. You may request ANY number of hours between that window.

Company Threshold

The “Company” Threshold will be determined each month AFTER bids close. If a bidder does NOT input a “Personal” threshold, they will be built to what the company decides to use as their threshold that month. This will be anywhere between 60:00 and 89:00(or up to 95:00 4 times a year). “Company” thresholds are based on the bidding behavior of the group for that month.

Threshold (continued)

Whether you input a PCT or are assigned the “Company” Threshold, the system has to award OVER the requested hours.

Example:

Bidder ask for 65:00 hours in their PCT. Bidder is assigned flying based on the bid sheet preferences, and the system gets to 64:50 credit. The system must award additional flying to get OVER the 65:00. The system will not stop at 64:50 because it is “close enough”. It HAS to be over the requested threshold.

NOTE: based on what you have input on your bid sheet preferences, the system could award an additional turn worth 5 hours (resulting in a final credit of 69:50) or the system could award an additional 4 day trip worth 25 hours(resulting in a final credit of 89:50).

FLICA

It is important to understand that FLICA is a computer program that will take the information that the bidder inputs into their bid sheets and create that bidders monthly schedule. It is a computer – not a person. It is important to:

READ EVERY POP UP

READ EVERY CONDITION'S FINE PRINT

EACH PREFERENCE LINE IS ITS OWN "THING"

(the computer reads each line individually; it does not remember what it just read when it completes a line.... and does not know what is coming next)

DEFINING TERMS WITHIN FLICA

- SCHEDULE BUILD OPTIONS
- GLOBAL for entire bid sheet
- Threshold
- Position Preference
- MAX Days on
- MIN Days Off

FLICANet - Schedule Building Options - Microsoft Edge

<https://frontier.flica.net/full/PrefSBO.html?>

Schedule Building Options

At Award time, PrefBid adheres to airline established schedule building rules which may be waived by request. Additionally, you may set a personal credit threshold that, to the extent allowed, will allow PrefBid to build your schedule to a credit value different from what is set by the airline.

PrefBid will assign pairings from your preferences until the awarded schedule exceeds the credit threshold (while remaining below the maximum credit value). If there are no more available and legal pairings and your schedule is above the minimum credit value, PrefBid will accept your schedule as complete.

Note: If your personal credit threshold is below or above the limits set by your airline, the threshold will be adjusted accordingly.

Set my personal credit threshold to hours

Position 1: 2: 3: 4: 5:

Set max consecutive days on to days *

Set min consecutive days off (all blocks) to days *

* Option will not be honored if only one bid sheet is used or if awarded from the last bid sheet.

SBO: Personal Credit Threshold at: 75:00, Positions: A,C,E,D,B

A note is displayed below the table: "Note: During the award process, PrefBid will treat all pairings in this preference order in which you list conditions is only important if the Cascade feature is used."

The Windows taskbar at the bottom of the screenshot shows the search bar with the text "Type here to search", several application icons, and the system tray with the time "3:37 PM" and date "9/11/2018".

Helpful Hints

“Helpful Hints” appear at the bottom of the Live Prefbid page every time you are constructing or editing your bid. They break down preference-based bidding on FLICA in the most basic way. In addition to these “Helpful Hints”, every time you add or edit a condition, including your SBOs, **READ THE ENTIRE POP-UP WINDOW!** Each popup for a condition explains what that condition does. Pay particular attention to anything in red. The best example is in the pop-up window for the Schedule Build Options (SBO), there is a red asterisk next to each of the “Max On” or “Min Off” conditions stating, “Condition will not be honored if only one bid sheet is used, or if schedule is awarded from the final bid sheet”. Think of any red text as a “red flag”.

Helpful Hints(as shown in FLICA)

- A preference can contain up to 10 conditions.
- Conditions that exclude pairings must be included in all preferences in which you want those pairings filtered.
- Add conditions to a preference until only equally desirable pairings are selected.
- Continue to submit preferences until equally desirable pairings have been grouped together and only equally undesirable pairings remain.
- A schedule will be built in the priority order of the preferences submitted.
- Every pairing in the “New Matches” column is considered in the award process.
- If necessary, all remaining pairings will be evaluated after the last preference on the final bid sheet.
- *Note:* If multiple bid sheets are submitted and no legal schedule can be built from the first bid sheet, all previously assigned pairings will be cleared and FLICA will attempt to build from the next bid sheet.

A preference can contain up to 10 conditions

A “preference” is a single line of your bid. A “condition” is a part of a preference that can be as basic as “Do not select Redeyes” or as complex as a list of specific days off.

Important conditions should be included on every line. If you put “Do Not Select Redeyes” only on the first line of your bid, and don’t include it on subsequent lines, the very first line without that condition CAN match Redeye pairings.

Each bidder is limited to no more than 200 preferences, or lines. If you use an SBO, that is considered to be one of the lines on each bid sheet. Each bid sheet also has a final line of “Pairings Not Included in this Bid Sheet” until the final sheet, which always ends with the line “All remaining Pairings”. So, for example, if you use an SBO and 2 bid sheets, you can submit up to 196 preference lines between the 2 bid sheets.

Add conditions until desired pairings are selected

By matching pairings on the same line, you are telling the system, I like all of these trips equally. If there are any of those trips that are more desirable than others (For example, some are worth more credit than others), then they should be on a higher line than those that are less desirable. An example might be a line that matches one day pairings (turns). If it matches turns worth 4:30 hours of credit on the same line as turns that are worth 7 hours of credit, the system is free to give you the 4:30 hour turns even if the 7-hour turns are still available.

Continue to submit preferences until equally desirable pairings have been grouped together and only undesirable pairings remain.

You should input enough preferences until only the very least desirable pairings are being matched by the “All remaining Pairings” line (the last line of the last bid sheet). How many pairings you should match should be determined by your **relative seniority** in your base. The most senior FAs can match only a very small percentage of the available pairings and still be relatively assured of a successful bid. The more junior you are, the more trips you should attempt to match on each line of your bid sheet. If the computer gets to “All remaining pairings”, it is free to assign you anything from that line. The only way to avoid that is to make sure that the computer has had the opportunity to assign you your entire schedule BEFORE it reaches that last line.

Your schedule will be built in the priority of your preferences

The system reads your bid and assigns your schedule line by line. The only conditions that are considered throughout your bid are those set in your SBO (Schedule Build Options). After that, each of your lines are considered one at a time. If the first preference of your bid is only the condition "Days Off" it will match HUNDREDS of pairings, and there's a very good chance that your entire schedule (or the majority of it) could be assigned from that line.

If the only condition on the second line of your bid is "Do not select CDOs", it's probably already too late, because line 1 could have filled most or all of your schedule with CDOs. This is why your most important condition(s) should be included on every line of your bid and be the only condition on the very last line of your bid. The computer will stop reading your bid as soon as it has assigned enough trips to either meet your PCT, the company threshold, or minimum schedule.

The computer will stop assigning you trips when it has filled your schedule with pairings you requested in your preference lines, or, if necessary, it WILL assign the remainder of your schedule from the "All Remaining Pairings" line.

Using Multiple Bid Sheets

If multiple bid sheets are submitted and no legal schedule can be built from the first bid sheet, all previously assigned pairings will be cleared and FLICA will attempt to build from the next bid sheet.

Multiple bid sheets should ONLY be used if you're using an SBO option that requires it OR if you have a completely different bid strategy on sheet 2 than you do on sheet 1. (FYI - Listing the same days off on both bid sheets will not give you a better chance of getting those days.)

EX:

Sheet 1: you request all weekday CDOs.

Sheet 2: you request 2 or 3 day trips on the weekends.

Using MAX and MIN Days off in SBO

Using both of the MAX and MIN conditions in the Schedule Build Options (SBO) is NOT advised for any bidder.

If you DO NOT BID in the top 10% of bidders, you should not use both of these options.

If you are a lower seniority, choose only one - NEVER both!!!

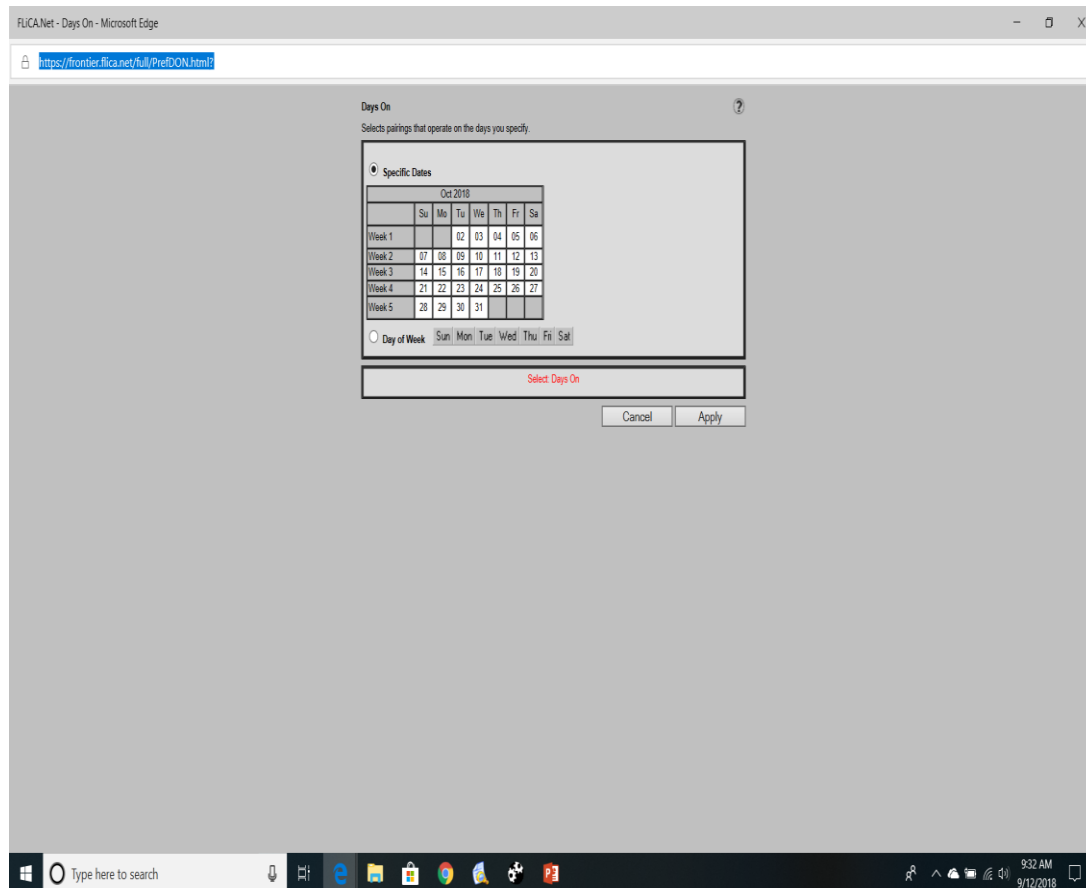

Using either of the MAX or MIN can negatively affect the number of hours a bidder receives as the system will meet the pattern of max or min without regard to the threshold requested.

MOST COMMONLY USED CONDITIONS

- Days On
- Days Off
- Pairing/Specific Pairing
- Credit Hours
- Block Hours
- CDO Pairings
- Red Eye Pairings
- Length of Pairing
- Date of Pairing
- Average Credit per day
- Block Hours (per pairing)
- Credit Hours (per pairing)
- Duty Period Release
- Duty Period Report
- Duty Period Length
- Legs on 1st/last duty period

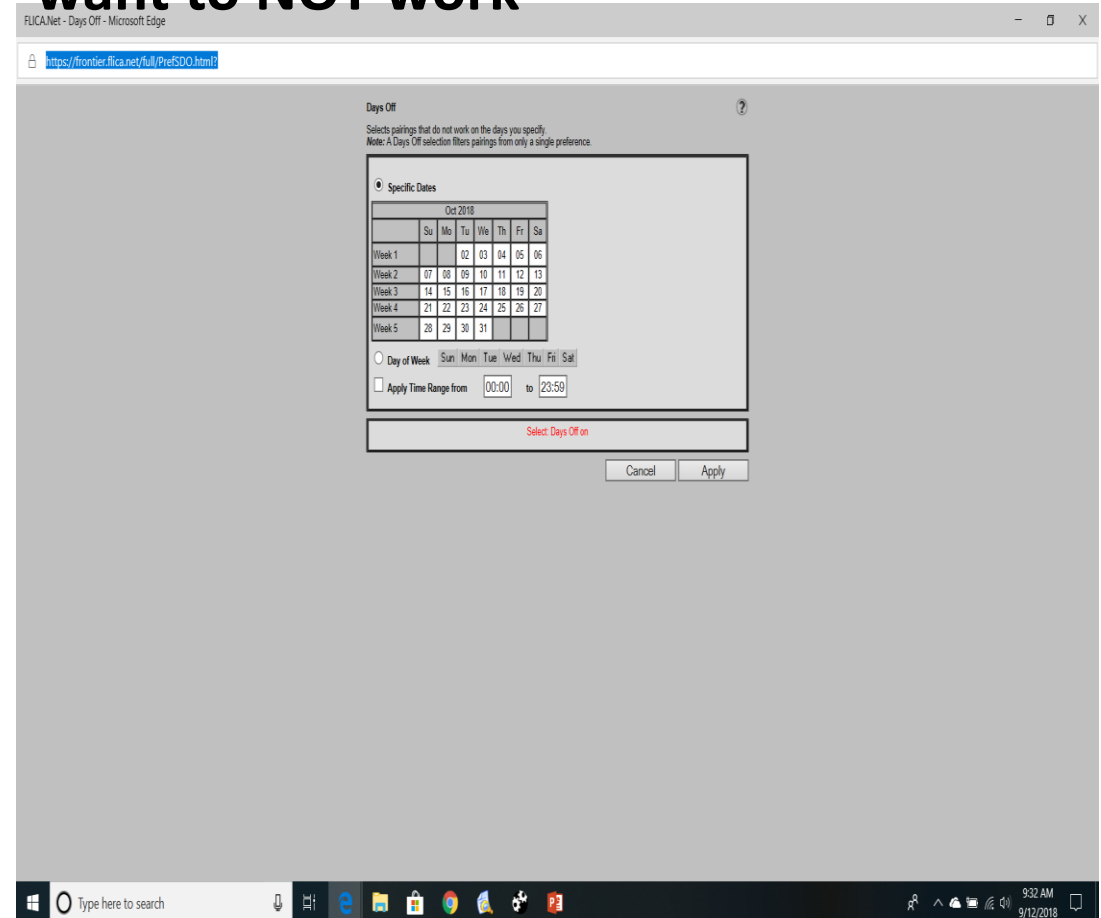

DAYS ON

Allows you to select specific days you want to work

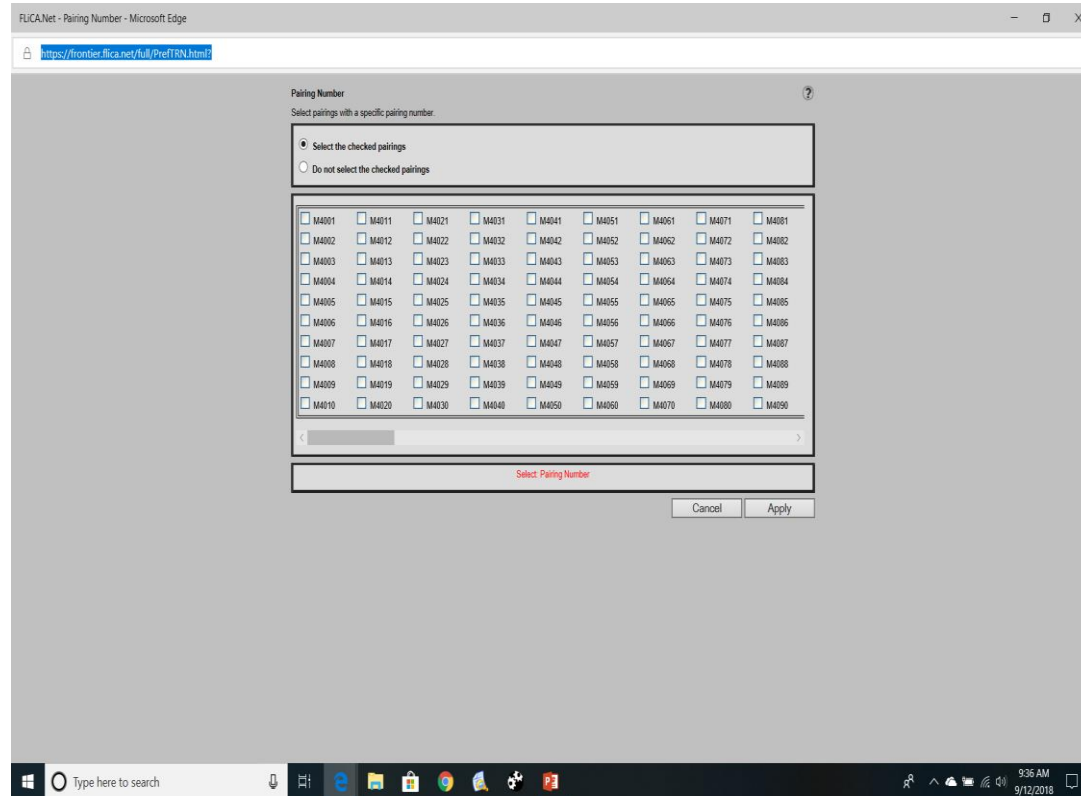

DAYS OFF

Allows you to select specific days you want to NOT work

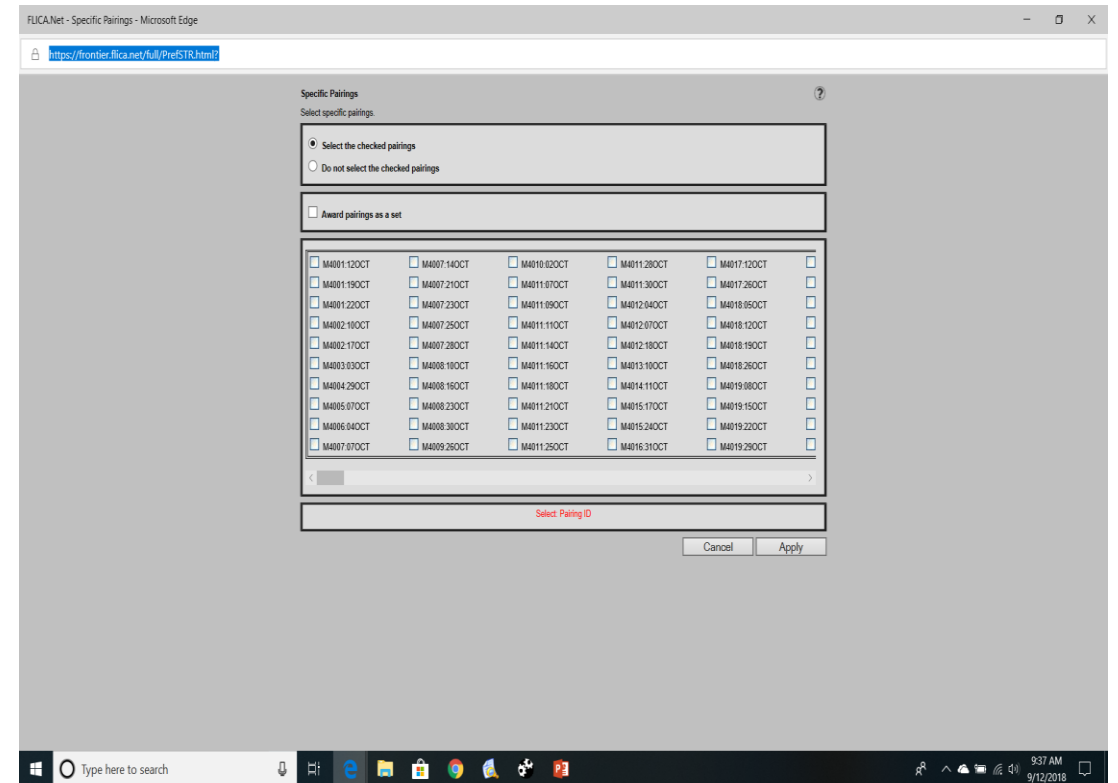

PAIRING

Allows you to select a pairing – which may repeat during the month

SPECIFIC PAIRING

Allows you to select a specific pairing on a specific date

CREDIT HOURS

Allows you to select pairings with a specific amount of CREDIT(all duty/DH)

FLYCANet - Credit - Microsoft Edge
https://frontier.flycanet.com/Full/PrefTRC.html?

Credit
Select pairings with a total credit greater than or less than a specific amount, or within or outside a range.

Select pairings with total Credit: At Least >= 00:00
No More Than <=
Equal To = + 90:00
Between
Not Equal To
Not Between

Cancel Apply

9:33 AM 9/12/2018

BLOCK HOURS

Allows you to select pairings with a specific amount of BLOCK (flight time)

FLYCANet - Block Hours - Microsoft Edge
https://frontier.flycanet.com/Full/PrefBLK.html?

Block Hours
Select pairings with a total block hours greater than or less than a specific amount, or within or outside a range.

Select pairings with total block hours: At Least >= 00:00
No More Than <=
Equal To = + 90:00

Week 4	21	22	23	24	25	26	27
Week 5	28	29	30	31			

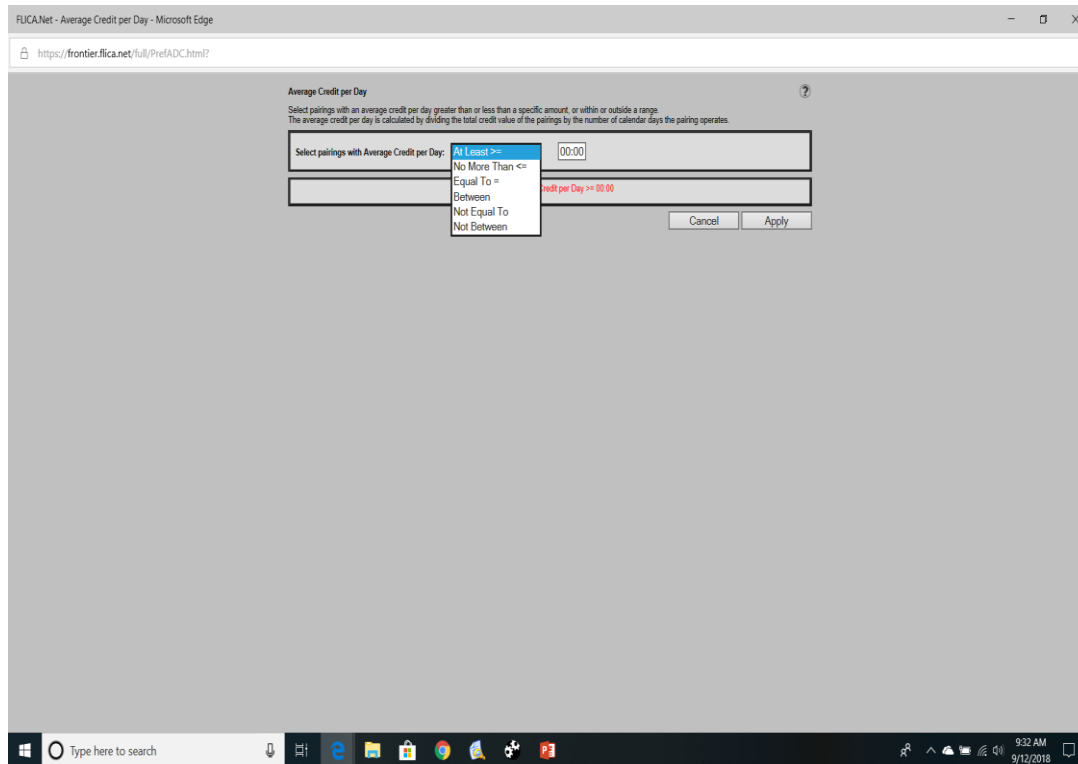

Day of Week Sun Mon Tue Wed Thu Fri Sat

Select Departing on

Cancel Apply

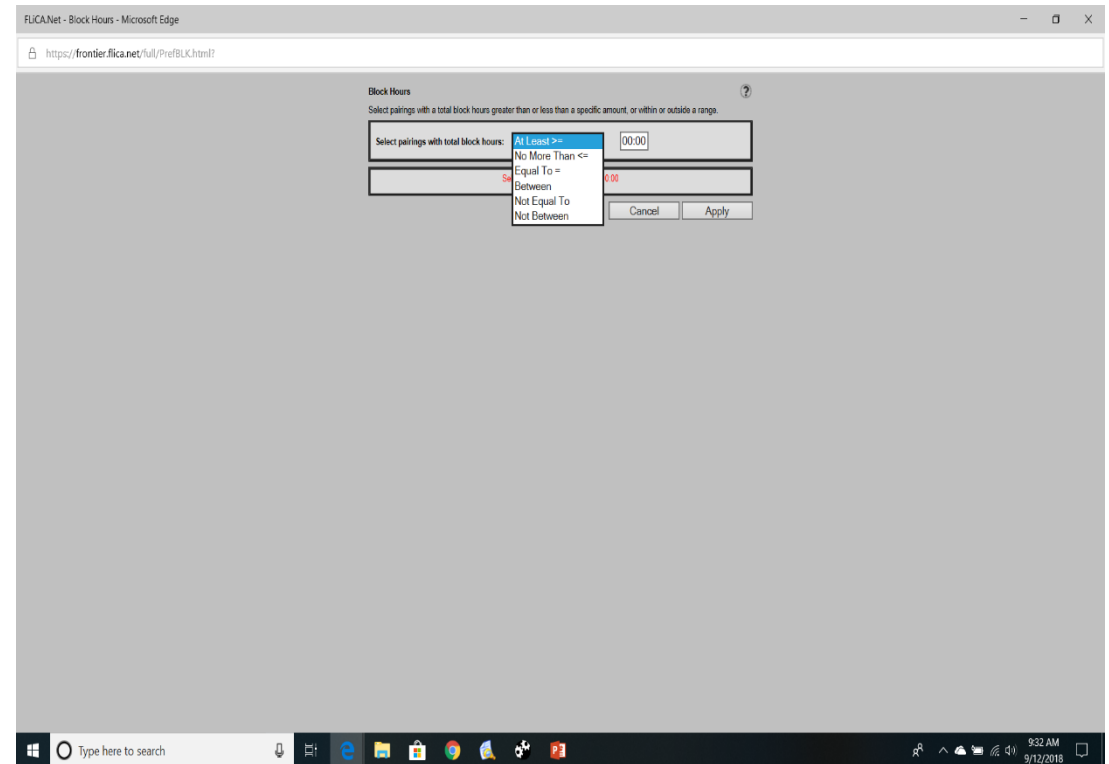

Average Credit Per Day

Averages the daily credit over the length of the pairing

Block Hours(per pairing)

Select pairings with a range of BLOCK hours

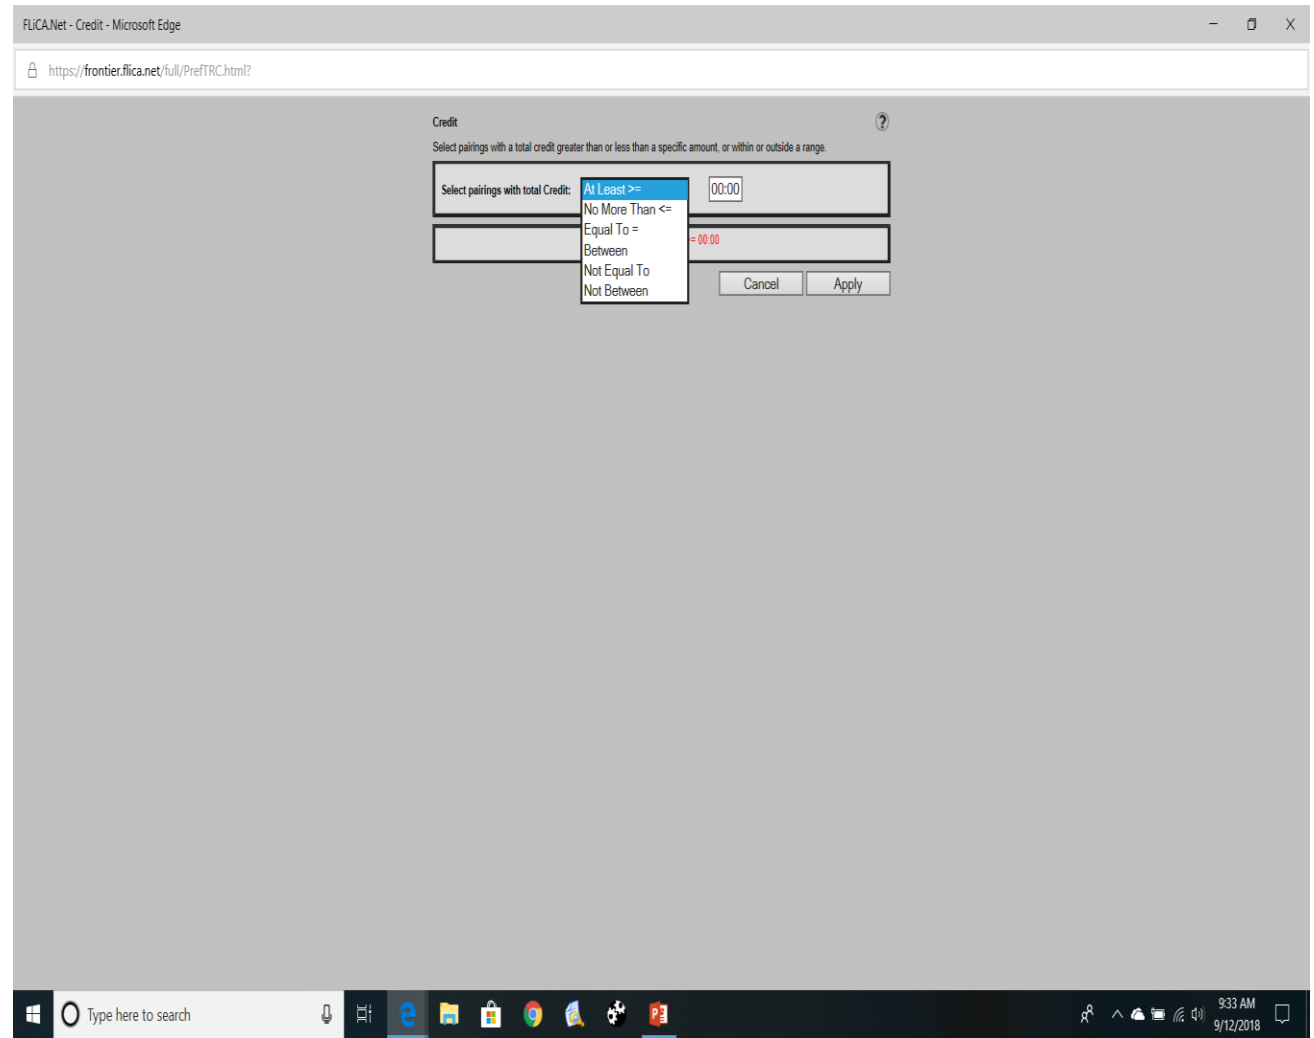

Credit (per pairing)

Just as with the BLOCK HOURS (per pairing) CREDIT allows a bidder to select pairings with a range of credit hours.

BLOCK = ACTUAL FLIGHT TIME

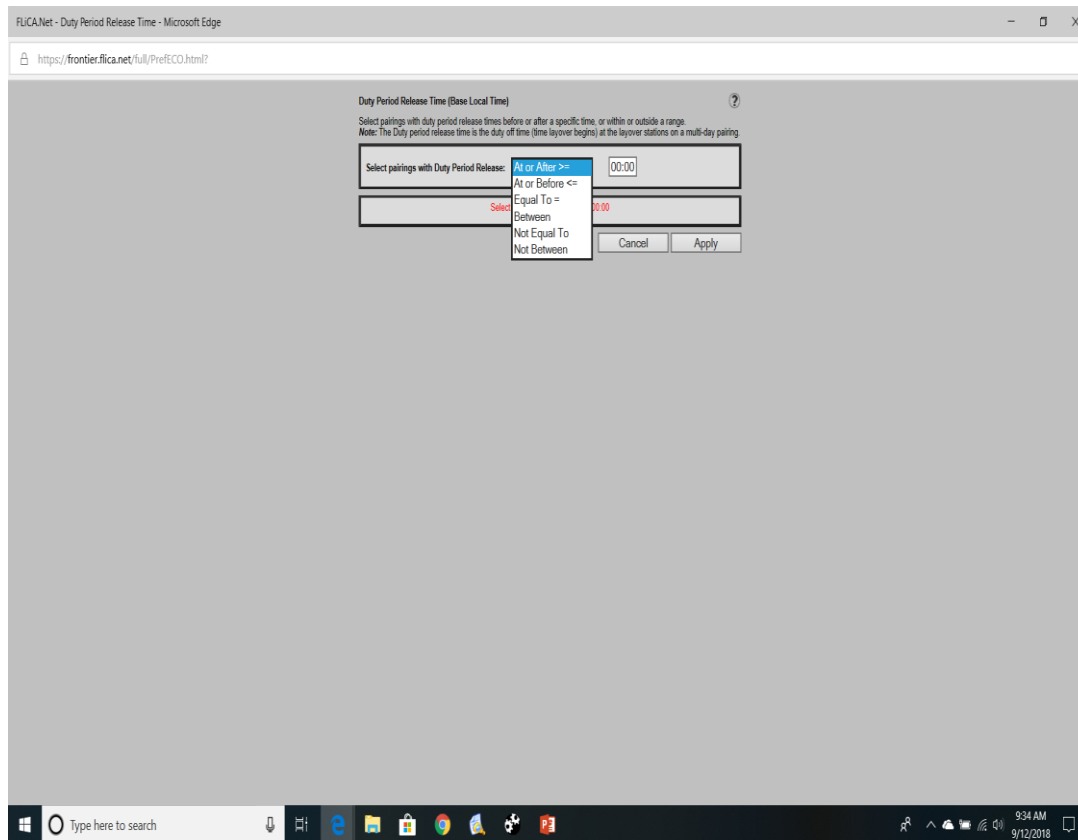

CREDIT = ACTUAL CREDIT

(DH and actual flight time)

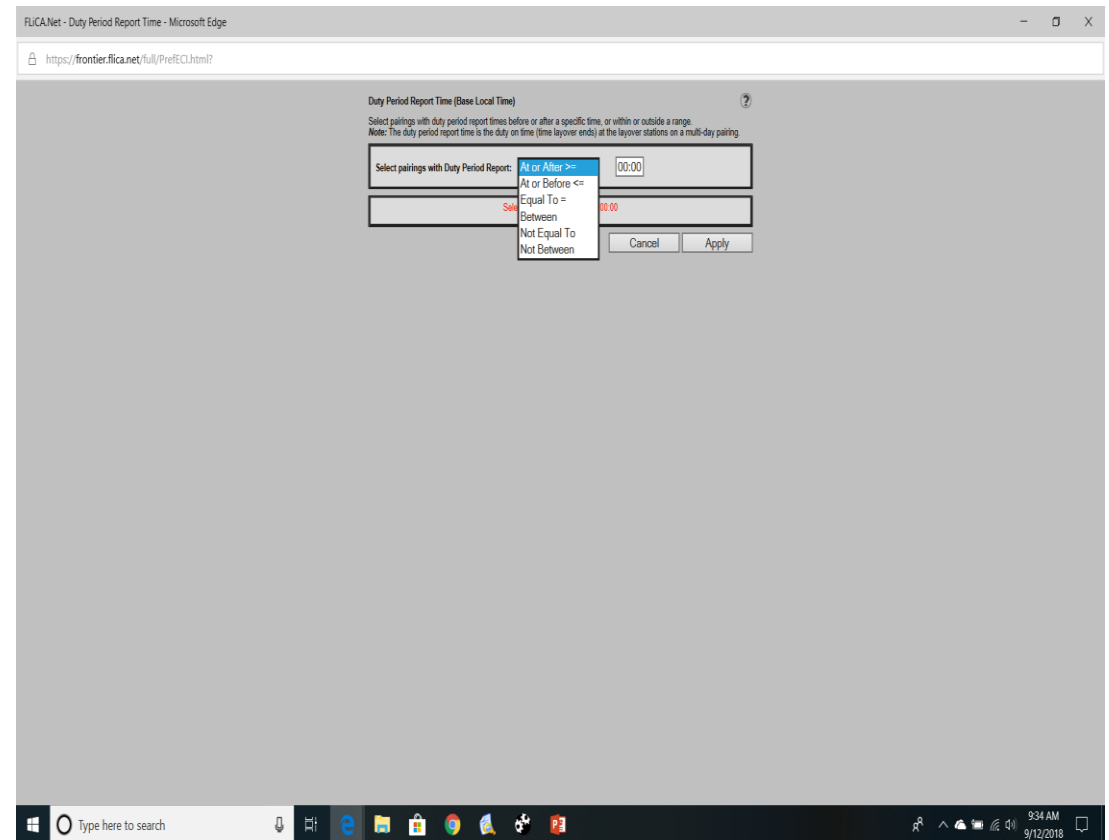

Duty Period Release

Select the time for duty periods release (within a pairing)

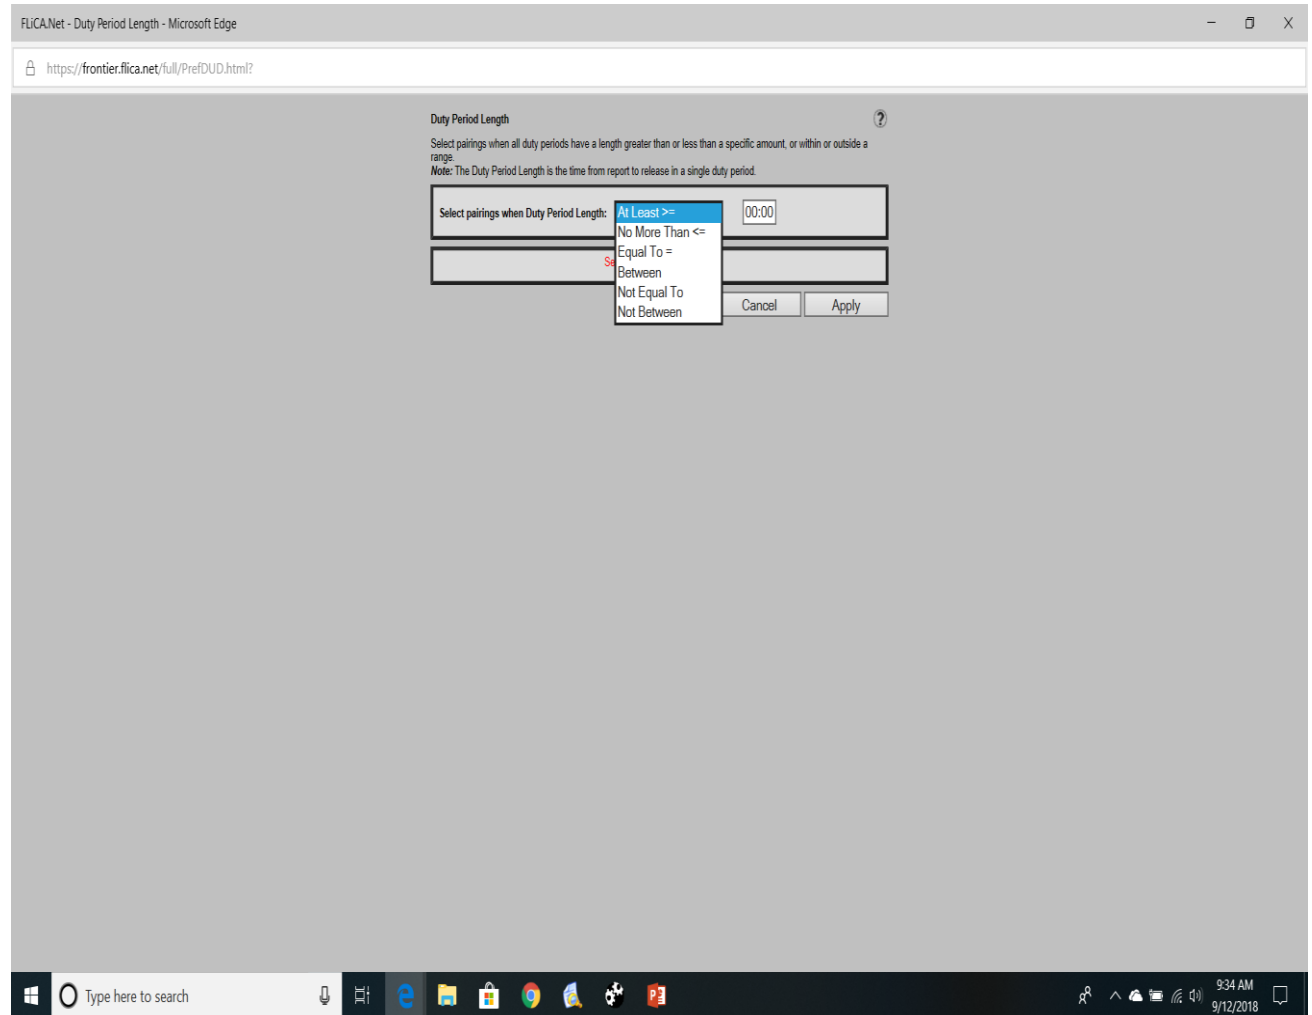

Duty Period Report

Select the time for duty periods report time (within a pairing)

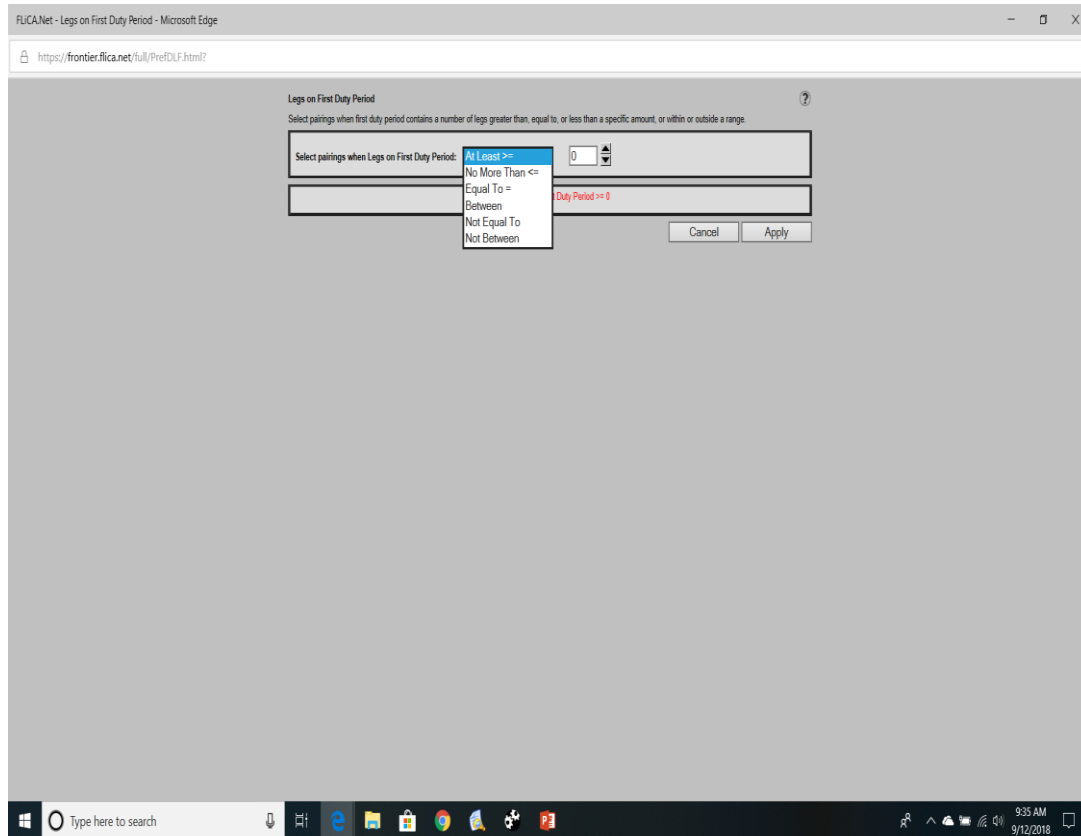

Duty Period Length

This condition allows a bidder to select how long of a duty day will be within pairings. The duty period is from report until release time on each day of a multi-day pairing.

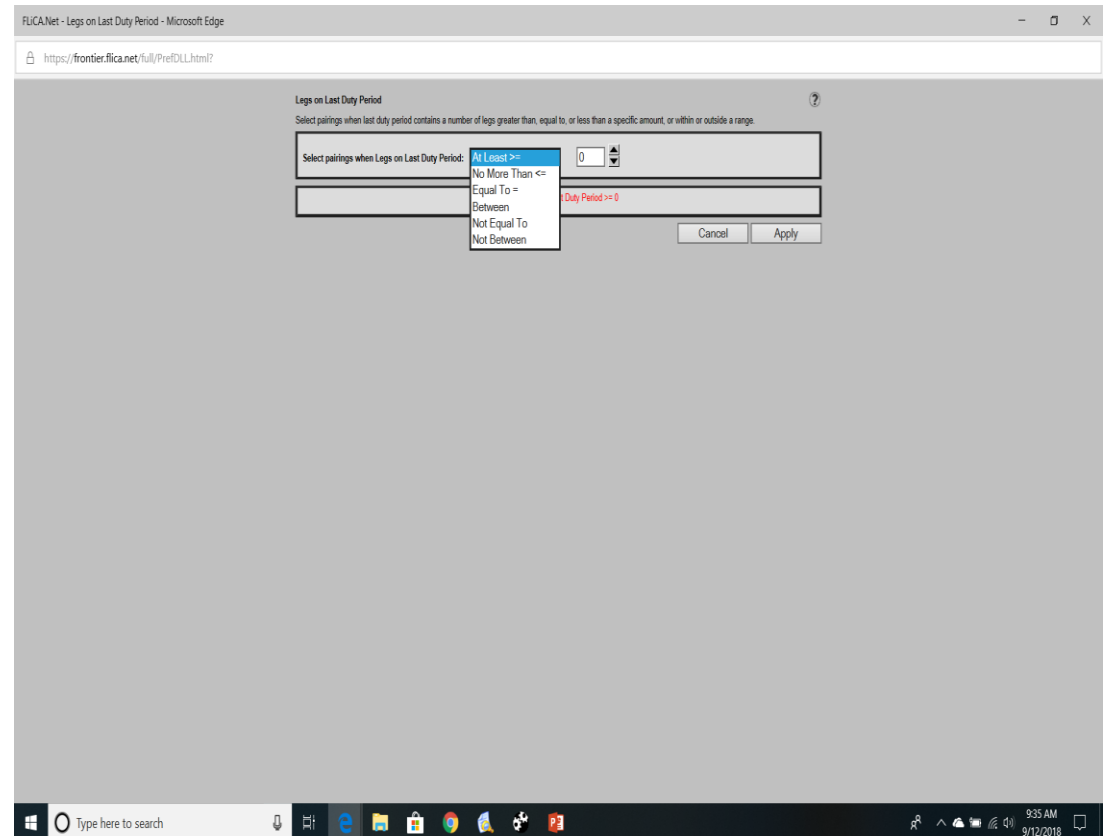

Legs on 1st Duty Period

Allows you to select how many legs on the first day of a pairing

Legs on LAST Duty Period

Allows you to select how many legs on the last day of a pairing

Helpful Hints

- A preference can contain up to 10 conditions.
- Conditions that exclude pairings must be included in all preferences in which you want those pairings filtered.
- Add conditions to a preference until only equally desirable pairings are selected.
- Continue to submit preferences until equally desirable pairings have been grouped together and only equally undesirable pairings remain.
- A schedule will be built in the priority order of the preferences submitted.
- Every pairing in the "New Matches" column is considered in the award process.
- If necessary, all remaining pairings will be evaluated after the last preference on the final bid sheet.

Note: If multiple bid sheets are submitted and no legal schedule can be built from the first bid sheet, all previously assigned pairings will be cleared and FLICA will attempt to build from the next bid sheet.

Define Terms on completed Bid Sheet

- Preview

Allows a bidder to see what the matches look like in a calendar form. Also, a bidder can “tag” pairings and submit them individually.

- All remaining Pairings

This line is what is left in the “pairing pot”. If the bidder’s schedule can not be completed from the preference lines, the computer will pull legal pairings from this line to complete the schedule.

Scheduling Committee

Bidders can email before and after Bids are posted. Questions about Bidding as well as concerns about results.
